## PROJECTS

### Interactive Analytics Dashboard [🔗](#)

January 2026 - January 2026

**Tech Stack:** React.js, Tailwind CSS, React Router, Firebase Auth, Context API, Recharts, REST API

- Built a **responsive analytics dashboard** with modern UI using React and Tailwind CSS.
- Implemented **secure Firebase authentication**, protected routes, global state management, and dynamic charts with REST API integration.
- Deployed the **production-ready application on Vercel** with optimized build configuration.

### E-commerce Home Page (React + Tailwind) [🔗](#)

Dec 2025 - Dec 2025

- Built a responsive, modern landing page for an online store with clean navigation and product sections
- Implemented hero banner, categories, featured products, and call-to-action components
- Focused on usability, performance, and mobile-first design
- Used reusable components and organized project structure for scalability

### Portfolio website [🔗](#)

March 2025 - April 2025

- Technologies: HTML, CSS, JavaScript
- "Frontend developer with a foundation in HTML, CSS, and JavaScript, focused on creating clear, responsive, and accessible web pages. Work centers on structured layouts, consistent design, and practical user experience. Committed to learning new techniques and improving development skills through real projects."

### Responsive landing page

January 2025 - February 2025

- Technologies: HTML, CSS
- "Responsive landing page designed to adapt smoothly across all screen sizes. The layout provides clear sections, readable content, and a simple navigation flow for users. Visual structure focuses on clarity, accessibility, and consistent spacing, ensuring an easy viewing experience on mobile, tablet, and desktop devices."
